A. VideoMatt Benchmark

We release the VideoMatt benchmark at this link for reference. It has motion and static subsets. The motion subset contains 50 clips with foregrounds from VideoMatte240K test set and backgrounds from the DVM test set. The static subset has 150 clips with foregrounds from Video-Matte240K test set and backgrounds from the BG20k test set. Each clip has 100 frames for inference.
