

A. Supplementary Material

B. More Qualitative Results

In Figures 5, 6, and 7, we report more qualitative results on the FSC147 test split. For each input image, we report i) the image itself, ii) the ground truth total count, iii) the density maps before and after background thresholding, and iv) the counting prediction.

Figures 8, 9, 10 and 11 are qualitative results from the CARPK test split with the same formatting.
