

Supplementary material for “SHaPE: A Novel  
Graph Theoretic Algorithm for Making  
Consensus-based Decisions in Person  
Re-identification Systems”

Figure 1: An example probe image with the top 3 matches for re-identification results using 5 individual algorithms and their consensus using SHaPE for VIPeR dataset

Figure 2: An example probe image with the top 3 matches for re-identification results using 5 individual algorithms and their consensus using SHaPE for CUHK01 dataset

Figure 3: An example probe image with the top 3 matches for re-identification results using 5 individual algorithms and their consensus using SHaPE for CUHK03 dataset
