In this supplementary material, we present more results produced by the proposed soft decoding method DPW-SDNet. More specifically, Fig. 1 shows the soft decoded results on color JPEG-compressed images. Fig. 2 shows the soft decoded results on gray-scaled JPEG 2000-compressed images. Fig. 3 shows the soft decoded results on color JPEG 2000-compressed images. These results demonstrate the effectiveness of the proposed DPW-SDNet further.

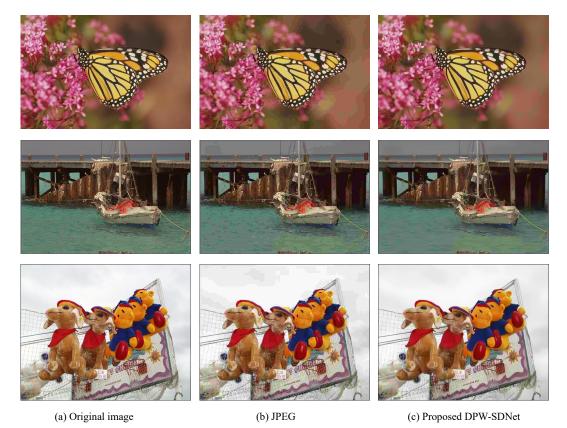

(a) Original image   (b) JPEG   (c) Proposed DPW-SDNet

Figure 1. Visual quality comparison of the JPEG-compressed images and soft decoded results using the proposed DPW-SDNet on color images in the case of quality factor 10. Please zoom in for better viewing.
